ConveyorBelt Service Hermann

Professional competence - Comprehensive Service from A to Z - High quality

We are on hand with qualified help and advice when starting and operating your conveyor belt system. This is exemplified by our comprehensive services and products we offer for conveyor belt systems and conveyor belts of all kinds such as fabric conveyor belts, chevron and sidewall conveyor belts. Everything about maintenance and repair of conveyor systems will be done by our team as expected - get in contact with us. **Our services we provide in the whole part of Germany and in particular in Baden-Württemberg.**

“One of our special advantages is our flexibility and customer loyalty. Get in contact with us and see for yourself.”

Our services

Professional conveyor belt service for your relief - Comprehensive service offer

On your conveyor system, we carry out all the usual inspections and service works and offer you all-round support. You profit from our professional expertise and our services for the simple reason that you get your conveyor system repaired in shipshape. Maintenance guarantees you optimum availability and thus ensures a long lasting operation and increased efficiency of your conveyor systems.

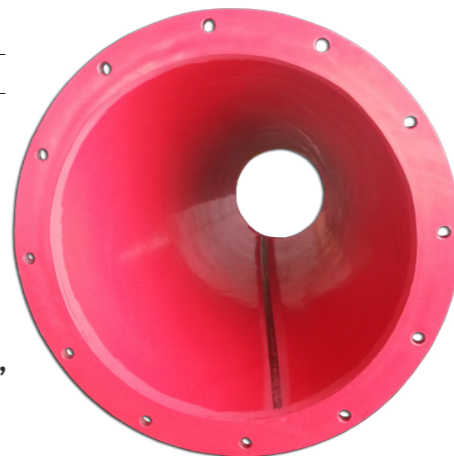

We have experience in doing linings with wear-resistant materials made of rubber, ceramics or PVC, in splicing works and repairs on conveyor belts, in lining of conveyor belt pulleys with ceramic linings or rubber materials, as well as in plant optimization for instance in centering of the conveyor belt or the maintenance and replacement of the idlers.

From construction and advice to the effective use of conveyor system components, from continuous repairs and the maintenance of the system components such as conveyor belts, conveyor belt pulleys, support rollers and idlers and the wear-resistant and impact-acting/shock absorbing rubber materials during operation of the conveyor system. Our service offers added value and relief for you as operator or constructor of conveyor systems. Quite simple, so you can concentrate on the essentials.

A conveyor belt damage? Rely on our professional conveyor belt service, of course also in case of an emergency. Just contact us 24/7.

Our product range

High-quality and long-lasting components for conveyor systems

FörderBand Service Hermann is at your disposal with numerous products for the efficient operation of your conveyor systems. Selected and high-quality components from well-known manufacturers as well as comprehensive accessories offer you the best possible solution for various requirements.

Transport systems and conveyor belts are used in almost all branches of industry. For the individual requirements, you receive from us, starting with the professional consulting, conveyor belts for your conveyor belt system. Whether in the extraction of sand, gravel or earth, in the cement and recycling industry, our fabric (textile) conveyor belts, steel cord or special conveyor belts i.e. with profiled surface for the steep angle conveying ensure an efficient material transport. In addition, you will also receive from us special conveyor belts such as sidewall belts for the vertical transport of bulk materials. This is how you can vertically raise your material.

Would you like a system check? As an application engineer, we would be pleased to advise you on the spot. We would be glad if you contact us by e-mail or call directly .
